- Response times are reduced
- Allows firefighters to create a safe path of exist
- Multiple displays can be distributed across a network
- Improves life safety for building occupants and firefighters
- Reduces risk of property loss
- List the occupancy levels during day and night
- Displays time sequenced activated detectors.

Description:

FirstVision is a revolutionary wayfinding navigational tool for firefighters and other emergency response teams. ONYX FirstVision™ comes complete with a touch screen display housed in its own enclosure. The system graphically displays critical information on the origin and spread of a fire; allowing firefighters to quickly locate and extinguish the fire.

With ONYX FirstVision™, Emergency Firefighters can immediately gather the information needed to accurately pinpoint the source of the fire and the rate at which it's spreading.

Crucial information is easy to access with a spatial, graphical depiction of the location of activated detectors and detector sequence of activation.

In addition, ONYX FirstVision™ is an interactive interface displaying a summary of building floor plans with the location of all fire alarm devices, water supplies, evacuation routes, access routes, gas, power and HVAC shutoffs, chemical and structural hazards in the building.
