Features:

- Separate speaker for call tone
- Simple two wire connection
- Includes wall mounting bracket

Description:

Warden Intercom Points (WIPs) are used to communicate between floor wardens and the main Emergency Evacuation Panel.

When the handset is lifted, the Fire phone automatically rings the Emergency Evacuation Panel. When the Emergency Evac Panel calls the WIP, the call tone sounds through the speaker in the body of the phone. When the handset is lifted, it automatically switches from the speaker in the body to the speaker in the handset.

The Fire phone is manufactured from strong ABS and is fire engine red in colour.
