

# AFP-3030

## PANEL TRAINING COURSE / MAINTENANCE

### COURSE OVERVIEW

*Comprehensive Course on AFP-3030 & Introduction to VFT Programming Suite*

The basic training module is for those new to the AFP-3030 addressable panel.

Installers, testers and service technicians will find this most useful as the course provides an understanding of panel functions, fault finding and basic programming.

### TRAINING DURATION

1 day: 8:30am – 4:30pm. Morning tea and lunch will be provided

If you have any food allergies, please inform us a week before the course date.

### PREREQUISITES

- Understanding of fire systems
- Basic computer literacy
- Laptop Required – minimum Windows 7 with Admin Access

### LEARNING OUTCOMES

*On completion of this course, attendees will be able to:*

- Interpret Displayed Events
- Understand and Operate the Fire Brigade Panel Interface
- Navigate through the AFP-3030 menu structure
- Define AFP-3030 system components
- Interpret, diagnose and resolve faults
- Identify System and ACS devices
- Understand Notifier detector and module functions
- Perform Basic Panel Programming and Auto Programming
- Modify detector settings and attributes
- Perform walk test function
- Basic programming changes
- Perform uploads and downloads (Local only)
- Run maintenance & history reports

### INSTRUCTIONAL METHOD

This course is delivered as a group instruction, PowerPoint presentation and practical demonstration. Students will have access to an AFP-3030 panel and field devices during the practical exercises **(for a minimum of 4 hours per group of 3)**. They will be provided with documentation and a FireSense USB.

### COSTS

\$250 ex GST

*Any 'no shows' may lead to 100% of the invoice being charged.*
